dialoghi

il vetro incontra il metallo e lo rende profondo, il metallo incontra il legno e lo rende caldo, il legno incontra la pietra e la rende epica, la pietra incontra il vetro e continua il racconto...

Un racconto di incontri non può che essere un racconto di piacevoli sorprese, di scoperte singolari, di imprevedibili affinità, ma anche di irriducibili contrasti e dinamiche contrapposizioni. Ciò che il legno scalda il metallo impreziosisce, ciò che il vetro lascia trasparire la pietra nasconde: storie che raccontano luoghi e progetti, attraverso ispirazioni esotiche e rigore geometrico in un infinito scambio tra forme e materie.

glass meets metal and gives it depth; metal meets wood and gives it warmth; wood meets stone and gives it an epic quality; stone meets glass, and the tale goes on...

A tale of meetings is inevitably a tale of pleasant surprises, unusual discoveries and unexpected affinities, but also of uncompromising contrasts and dynamic oppositions. What wood warms is made precious by metal, what glass reveals stone conceals: stories of places and architectural projects, told through exotic inspirations and geometrical severity in an infinite exchange between shapes and materials.

le verre s'unit au métal et lui donne de la profondeur ; le métal s'unit au bois et lui donne de la chaleur ; le bois s'unit à la pierre et lui donne un goût épique ; la pierre s'unit au verre et l'histoire continue...

Une histoire d'unions ne peut être qu'une histoire de surprises agréables, de découvertes singulières, d'affinités imprévues, mais aussi de contrastes irréductibles et d'antagonismes prononcés. Le métal enrichit ce que le bois réchauffe, la pierre cache ce que le verre découvre : des histoires qui parlent de lieux et de projets, avec des inspirations exotiques et une rigueur géométrique, avec mille et une alliances entre les formes et les matières.

dialoghi

design Francesco Lucchese

Glas trifft auf Metall und verleiht ihm Tiefe, Metall trifft auf Holz und verleiht ihm Wärme, Holz trifft auf Stein und verleiht ihm Historie, Stein trifft auf Glas und...

Eine Geschichte von Begegnungen kann zwangsläufig nur eine Geschichte von angenehmen Überraschungen, einzigartigen Entdeckungen, unverhofften Verwandtschaften, aber auch von unüberwindlichen Kontrasten und dynamischen Gegensätzen sein. Das, was das Holz erwärmt, wird vom Metall veredelt, was das Glas durchscheinen lässt, wird vom Stein verborgen: Geschichten von Orten und Projekten mit exotischen Anregungen und strengen Geometrien in einem unendlichen Wechselspiel zwischen Form und Materie.

el vidrio se encuentra con el metal y le confiere profundidad, el metal se encuentra con la madera y le otorga calidez, la madera se encuentra con la piedra y le da un aire épico, la piedra se encuentra con el vidrio... y sigue la historia...

Una historia de encuentros no puede ser más que una historia de agradables sorpresas, de singulares descubrimientos, de imprevisibles afinidades, pero también de contrastes irreducibles y contraposiciones dinámicas. Aquello a lo que la madera da calor, el metal lo embellece; lo que el vidrio deja ver, la piedra lo esconde: historias que cuentan lugares y proyectos a través de inspiraciones exóticas y rigor geométrico en un infinito intercambio entre formas y materias.

стекло встречается с металлом и делает его глубоким, металл встречается с деревом и делает его теплым, дерево встречается с камнем и делает его эпическим, камень встречает стекло и продолжает рассказ...

Рассказ о встречах не может быть ни чем иным, как рассказом о приятных сюрпризах, об удивительных открытиях, о непредвиденных сходствах, а также о непоколебимых контрастах и динамичных противостояниях. То, что греет дерево, делает более ценным металл, то, что пропускает через себя стекло, прячет камень. Истории, рассказывающие о местах и проектах путем экзотического вдохновения и геометрической строгости в бесконечной череде форм и материй.

le nuove materie

La qualità delle materie è il cuore del progetto Dialoghi: le tessere in legno nobile provengono da doghe tagliate direttamente dai tronchi, poi essiccate, stabilizzate ed infine trattate con una speciale verniciatura che le rende molto resistenti agli agenti chimici e all'abrasione ed idonee all'utilizzo in ambiente bagno su pareti a scivolamento d'acqua; le tessere in pietra sono incise dopo aver affinato la materia prima dalla roccia grezza naturale, con una tradizionale lavorazione tutta italiana.

the new materials

The creative combination of materials is at the heart of the Dialoghi project. Colour, form and matter are the starting-point for a seemingly limitless range of compositions. The chips form varied surfaces where transparency, opacity, iridescence, glints of metal and the beauty and warmth of natural stone all meet. The combinations, patterns and variations on themes interweave to generate designs that are always original and will always surprise, to "compose" the individual's living-space and life-style.

les nouvelles matières

L'alliance capricieuse des matières, c'est ainsi que peut se résumer le projet Dialoghi. La couleur, la forme, la matière sont nos ingrédients de base pour nous livrer à un jeu d'assemblage qui semble ne jamais se terminer. Les tesselles forment des surfaces hétéroclites, où s'amalgament la transparence, l'opacité, l'irisation, les éclats métalliques, le charme et la chaleur de la pierre naturelle. Les associations, les fantaisies, les variations à thème sont les éléments qui assurent l'originalité des projets, leur nature surprenante pour « personnaliser » notre cadre – et style – de vie.

Die neuen Materialien

Die kreative Zusammenstellung der Materialien macht den Kern des Projektes Dialoghi aus. Farbe, Form und Materie bilden die Ausgangselemente für Kompositionen, denen keine Grenzen gesetzt zu sein scheinen. Die Mosaiksteine lassen heterogene Flächen entstehen, auf denen transparente, matte, schillernde oder metallisch glänzende Optiken und die edle Ausstrahlung des Natursteins in faszinierender Weise ineinanderspielen. Die Kombinationen, Muster und Themenvariationen verflechten sich zu originellen, erstaunlichen Projekten, die sich dem individuellen Lebensraum und Lebensstil widmen.

nuevos materiales

La combinación creativa de los materiales es el núcleo del proyecto Dialoghi. El color, la forma y la materia son los elementos fundamentales en los que se basa un juego de composición que parece no tener límites. Las teselas forman superficies heterogéneas en las que podemos encontrar transparencias, tonos mates, iridiscencias, destellos metálicos y el encanto y la calidez de la piedra natural. Las combinaciones, los modelos, las variaciones sobre un mismo tema se entremezclan generando proyectos originales y sorprendentes que nos permiten “componer” nuestro hábitat y nuestro modo de vivir.

новые материи

Творческое сочетание материй - это сердце проекта Dialoghi. Цвет, форма, материя - это базовые элементы, из которых следует исходить в игре композиций, которая, кажется, не имеет границ. Кусочки образуют однородные поверхности, на которых встречаются прозрачность, матовость, переливчатость цвета, металлические отблески, очарование и тепло природного камня. Сочетания, модели, вариации на тему - это те переплетения, которые создают оригинальные и удивительные проекты для “составления” своего места и образа жизни.

il mosaico come tu lo vuoi

Dialoghi è disegnata da Francesco Lucchese e può ora essere protagonista di progetti personalizzati.

Scegliere tra le materie, tra le varietà delle essenze dei legni e delle pietre naturali, tra i layout diversi, porta progettisti e designer a creare un proprio mosaico che esprime il concetto forte e contemporaneo di lusso: l'unicità e l'esclusività sta nella personalizzazione. Ciò permette di trovare le giuste tonalità del legno, il coordinamento con l'arredamento o il rivestimento o semplicemente le vibrazioni di un colore originale.

Exactly the mosaic you want

Dialoghi is designed by Francesco Lucchese and can now become the key feature in personalised design schemes.

Choosing between the materials, the varieties of types of wood and natural stones, and the different layouts, leads architects and designers to create their own mosaic, expressing a strong, contemporary concept of luxury: customisation is the key to a unique, exclusive covering. This makes it possible to find the right shades of wood, to match the furnishings or the background coverings, or simply respond to the vibrations of an original colour.

la mosaïque dont vous rêvez

La collection Dialoghi by Francesco Lucchese est maintenant prête à donner corps à vos projets personnels.

Choisir parmi les matières, parmi les diverses essences de bois, parmi les myriades de pierres naturelles, parmi les différents schémas de pose, c'est ce qui pousse les architectes et les designers à créer leur propre mosaïque pour exprimer le concept, à la fois intense et moderne, du luxe : l'originalité et l'exclusivité sont fonction de la personnalisation. Ceci vous permet de trouver la bonne tonalité de bois, la coordination avec le mobilier ou avec le revêtement mural, ou tout simplement, les vibrations d'une couleur originale.

Das Mosaik nach Wunsch

Dialoghi wurde von Francesco Lucchese entworfen und kann nun in individuell abgestimmte Projekte eingebunden werden.

Die Auswahl unter den Materialien, den Hölzern und den Natursteinen sowie den verschiedenen Layouts ermöglicht Planern und Designern, ein individuelles Mosaik zu schaffen, das ein starkes, zeitgemäßes Luxuskonzept zum Ausdruck bringt: Einmaligkeit und Exklusivität liegen in der Individualisierung. Auf diese Weise können die richtigen Farbnuancen des Holzes, die Abstimmung auf die Einrichtung oder die Wandverkleidung oder einfach die Gestaltungskraft einer originellen Farbe gefunden werden.

el mosaico tal como tú lo quieres

Dialoghi, colección diseñada por Francesco Lucchese, ahora brinda la posibilidad de crear proyectos personalizados.

La libertad de elegir los materiales, los tipos de madera y piedra natural, así como los distintos diseños, ofrece la posibilidad a proyectistas e interioristas de crear un mosaico personalizado que exprese el concepto fuerte y actual de lujo: el carácter único y exclusivo radican en la personalización. Se puede optar por la tonalidad cromática más adecuada de la madera, a juego con la decoración o el revestimiento o, sencillamente, por los matices de un color original.

такая мозаика, которая вам нужна

Dialoghi разработана Франческо Луккесе и сейчас может быть главным героем персонализированных проектов.

Выбор из материй, разнообразия пород дерева и природных камней, из разнообразных рисунков заставляет проектировщиков и дизайнеров создавать собственную мозаику, выражающую сильную и современную концепцию роскоши: уникальность и эксклюзивность заключаются в персонализации. Это позволяет найти нужный тон дерева, сочетание с мебелью или облицовкой или же просто дрожь оригинального цвета.

la qualità della materia

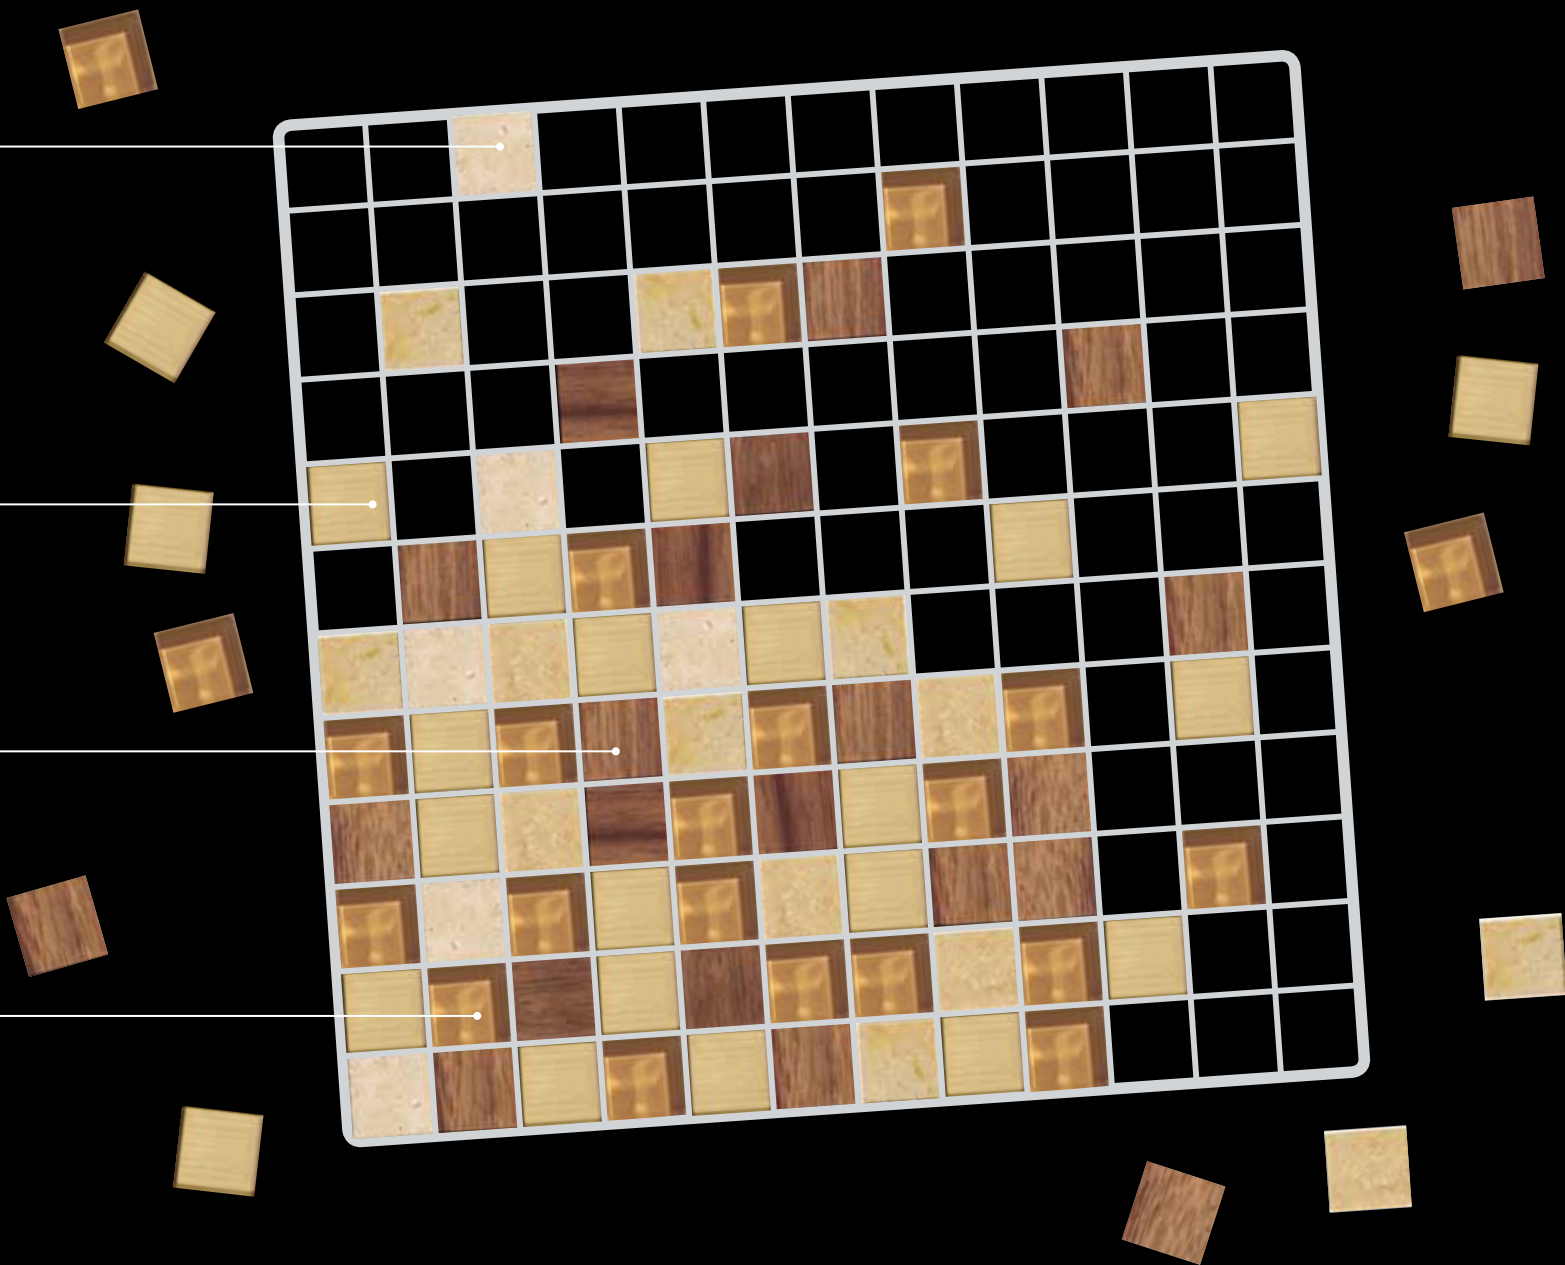

Mosaico+ ha riservato per la collezione Dialoghi la migliore selezione delle materie prime e delle lavorazioni con processi produttivi ad alta tecnologia. Le tessere in legno nobile provengono da doghe tagliate direttamente dai tronchi, poi essiccate, stabilizzate ed infine trattate con una speciale verniciatura che le rende molto resistenti agli agenti chimici e all'abrasione ed idonee all'utilizzo in ambiente bagno su pareti a scivolamento d'acqua; le tessere in pietra sono incise dopo aver affinato la materia prima dalla roccia grezza naturale, con una tradizionale lavorazione tutta italiana.

the quality of the material

For its Dialoghi collection, Mosaico+ has used the choicest raw materials and high-tech production processes. The fine wood chips come from slats cut directly from logs that are then dried, stabilised and finally treated with a special varnish that gives them outstanding resistance to chemicals and abrasion and makes them suitable for use in bathrooms on walls over which water runs; the stone chips are carved after the natural raw stone has been prepared and perfected using a traditional, all-Italian process.

la qualité de la matière

Pour la collection Dialoghi, Mosaico+ n'a sélectionné que les meilleures matières premières et les techniques de production les plus avant-gardistes. Les tesselles de bois noble proviennent de planches taillées directement dans le tronc, séchées, stabilisées, puis traitées avec un vernis spécial pour garantir une très grande résistance aux produits chimiques et à l'abrasion. Elles peuvent être appliquées dans la salle de bains, sur les murs en contact direct avec l'eau. Avant la coupe, les tesselles de pierre sont exposées à un traitement traditionnel, typique de l'industrie italienne, qui affine la pierre naturelle brute.

Die Materialqualität

Mosaico+ verwendet für die Herstellung der Kollektion Dialoghi die hochwertigsten Rohstoffe und hochmoderne Produktionsverfahren. Die Mosaiksteine in Edelholz stammen von direkt aus den Stämmen geschnittenen Holzlatten, die getrocknet, stabilisiert und anschließend mit einem Speziallack behandelt werden, der sie besonders chemikalien- und abriebbeständig und geeignet für den Einsatz in Badbereichen an spritzwassergefährdeten Wänden macht. Die Mosaiksteine in Stein werden geschnitten, nachdem der Rohstoff nach einem traditionellen italienischen Verfahren aus dem Rohfelsstein herausgearbeitet wurde.

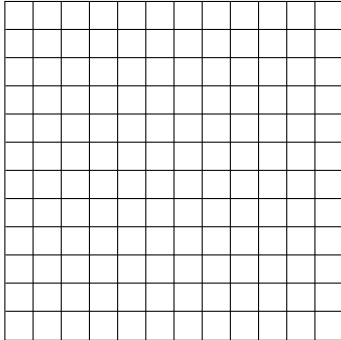

la calidad de los materiales

Mosaico+ ha reservado para la colección Dialoghi la mejor selección de materias primas y elaboraciones aplicadas con procedimientos productivos de alta tecnología. Las teselas de madera noble provienen de tablas cortadas directamente de los troncos, secadas, estabilizadas y tratadas con una imprimación especial que las protege frente a los agentes químicos y la abrasión y que las convierte en idóneas para ser utilizadas en espacios como el baño y para revestir paredes húmedas o incluso mojadas por la condensación del vapor de agua; las teselas de piedra, una vez afinada la materia prima procedente de la roca basta natural, son grabadas con una elaboración tradicional genuinamente italiana.

качество материи

Для коллекции Dialoghi Mosaico+ предоставила наилучшую подборку сырья и обработок в высокотехнологичных производственных процессах. Кусочки ценных пород дерева получены из досок, выпиленных непосредственно из бревен, после чего они были высушены, стабилизированы, наконец, обработаны специальным покрытием, которое делает их очень стойкими к химическому воздействию и истиранию, а также пригодными к использованию в ванной комнате на влажных стенах. Кусочки из камня нарезаны после отделки сырья, полученного из необработанных пород, чисто итальянской обработкой.

Colorepoxy

Colorepoxy è una gamma di stucchi epossidici colorati di nuova generazione creati appositamente per Mosaico+, in grado di abbinarsi perfettamente alle diverse tipologie di mosaici, sia vetrosi che realizzati con materiali eterogenei.

Colorepoxy è una malta epossidica bicomponente decorativa per la stuccatura e la posa di tutti i tipi di mosaico, sia vetrosi che realizzati con materiali eterogenei, creata appositamente per Mosaico+. Colorepoxy è a base di resine epossidiche e speciali componenti, caratterizzati da un particolare effetto translucido, con un'eccellente resistenza agli acidi ed un'ottima pulibilità, studiata per la posa con fughe di almeno 2 mm e disponibile in 25 colori. Le caratteristiche: ottima resistenza meccanica e chimica e quindi durabilità; superficie liscia e compatta, non assorbente e facilmente pulibile, quindi igienica; facilità di lavorazione e finitura; esente da ritiri e quindi da crepe e fessurazioni; resistente agli agenti atmosferici, con grande uniformità nei colori e ottima adesività.

Colorepoxy lux è una gamma di glitter colorati e metallizzati a base di poliestere e alluminio, caratterizzati da un particolare effetto brillante creato dalle particelle luminose e scintillanti: da utilizzare prevalentemente in abbinamento alla base neutra o agli altri colori della gamma Colorepoxy.

Colorepoxy is a range of new-generation coloured epoxy grouts, providing a perfect match for the different types of mosaics, whether in glass or made from a mixture of materials.

Colorepoxy is a decorative dual component epoxy cement for grouting and laying mosaics of all kinds, both vitreous and in a variety of other materials, specially created for Mosaico+. Colorepoxy contains epoxy resins and special ingredients and provides a special translucent effect. With excellent resistance to acids and very easy to clean, it is intended for laying materials with joints of at least 2 mm and is available in 25 colours. Characteristics: excellent mechanical strength and resistance to chemicals, giving durability; smooth, compact, non-absorbent surface, easily cleaned and thus hygienic; easy workability and finishing; no shrinkage meaning no crazing or cracks; resistance to weather; outstanding uniformity of colour and excellent adhesion.

Colorepoxy lux is a range of coloured and metallic glitters containing polyester and aluminium; it has an unusual sparkling appearance created by bright, glittering particles. For use mainly in combination with the neutral base or other colours in the Colorepoxy range.

Colorepoxy est une gamme de joints époxy colorés de la nouvelle génération, créés tout spécialement pour Mosaico+, qui peuvent parfaitement être assortis aux différentes typologies de mosaïques, aussi bien vitreuses que réalisées avec des matériaux hétérogènes.

Colorepoxy est un mortier époxy décoratif bi-composant. Il sert à réaliser les joints et à poser des mosaïques en tout genre, en verre ou à base de différents matériaux. La formule de Colorepoxy est à base de résines époxy et de composants spéciaux, caractérisés par un effet translucide particulier, avec une excellente résistance aux acides et une nettoyabilité optimale. Il convient à la perfection aux poses avec joints de 2 mm minimum. Il existe en 25 couleurs. Les caractéristiques : excellente résistance mécanique et chimique, et dès lors, excellente durabilité ; surface lisse et compacte, imperméable et facile à nettoyer, donc hygiénique ; grande malléabilité et belle finition ; pas de retrait, donc pas de fissures ou de craquements ; bonne résistance aux agents atmosphériques ; couleurs uniformes et excellente adhérence.

Colorepoxy lux est une gamme de glitters colorés et métallisés à base de polyester et d'aluminium. Le produit se caractérise par l'éclat particulier créé par ses particules lumineuses et scintillantes : à utiliser principalement avec la base neutre ou avec les autres couleurs de la gamme Colorepoxy.

Colorepoxy ist eine Serie von farbigen Epoxy-Spachtelmassen der neuen Generation, die eigens für Mosaico+ entwickelt wurde. Sie ist für verschiedenartige Mosaik, sowohl Glasmosaik als auch mit ungleichartigen Materialien hergestellte, vorgesehen.

Colorepoxy ist eine farbige 2-Komponenten-Epoxyd-Fugenmasse zum Verfugen und Verlegen aller Arten von Mosaik, sei es aus Glas oder anderen Materialien. Colorepoxy besteht aus Epoxidharzen und Spezialkomponenten, die einen besonderen durchscheinenden Effekt erzeugen. Die Fugenmasse hat eine ausgezeichnete Säurebeständigkeit und eine hervorragende Reinigungsfähigkeit. Sie ist für Fugenbreiten ab 2 mm vorgesehen und in 25 Farben erhältlich. Merkmale: ausgezeichnete mechanische und chemische Beständigkeit und folglich hohe Langzeitqualität; glatte, kompakte, nicht absorbierende und reinigungsfreundliche Oberfläche und folglich große Hygiene; einfache Bearbeitung und Oberflächenverarbeitung; keine Schwindungsverluste und folglich keine Risse und Spalten; wetterbeständig, einheitliche Farben und hervorragende Hafteigenschaften. Colorepoxy lux ist ein Sortiment von farbigen metallischen Glitterpigmenten auf Polyester- und Aluminiumbasis. Die Produkte schaffen aufgrund der Glanzpartikel einen besonderen Glimmereffekt. Speziell für die Verwendung in Kombination mit der neutralen Grundmasse oder den anderen Farben aus der Colorepoxy Farbpalette.

Colorepoxy es una gama de estucos epoxídicos coloreados de nueva generación, capaz de combinarse perfectamente con los diferentes tipos de mosaicos, tanto de vidrio como aquellos realizados con materiales heterogéneos.

Colorepoxy es un mortero epoxídico de dos componentes, decorativo, para el estucado y la colocación de toda clase de mosaicos, tanto vitreos como fabricados con materiales heterogéneos, creado a propósito para Mosaico+. Colorepoxy está formado por una base de resinas epoxídicas y componentes especiales que se caracterizan por su peculiar efecto translúcido, su excelente resistencia a los ácidos y su óptima limpiabilidad, estudiada para la colocación con juntas de por lo menos 2 mm y disponible en 25 colores. Características: resistencia mecánica y química excelentes, y en consecuencia, extraordinaria durabilidad; superficie lisa y compacta, no absorbente y fácil de limpiar, por lo que resulta sumamente higiénica; facilidad de elaboración y acabado; material no sujeto a contracción, de modo que no se producen grietas ni resquebrajaduras; resistente a los agentes atmosféricos, con gran uniformidad en los colores y óptima adhesividad. Colorepoxy lux es una gama de glitters de colores y metalizados a base de poliéster y aluminio que se caracterizan por su peculiar efecto brillante debido a los destellos generados por sus luminosas partículas: se recomienda su empleo sobre todo en combinación con bases neutras u otros colores de la gama Colorepoxy.

Colorepoxy - это гамма цветных эпоксидных затирочных смесей нового поколения, созданная специально для Mosaico+, прекрасно гармонирует с любым типом мозаики, как стеклянной, так и выполненной из разнородных материалов. Colorepoxy - это декоративная двухкомпонентная эпоксидная затирочная смесь для затирки и укладки любого типа мозаики, как стеклянной, так и выполненной из разнородных материалов. Colorepoxy приготавливается на основе эпоксидных смол и специальных компонентов, которые характеризуются особым прозрачным эффектом с удивительной кислотостойкостью и отличной очищаемостью. Клей разработан для укладки с швами не менее 2 мм и может быть 25 цветов. Характеристики: отличная механическая прочность и химическая стойкость, следовательно, долговечность; гладкая и плотная поверхность, не впитывающая влагу и легко очищающаяся, следовательно, гигиеническая; простота обработки и отделки; отсутствие усадки, следовательно, трещин и щелей; стойкость к атмосферным осадкам, большая однородность цветов и отличная склеивающая способность. Colorepoxy lux – это гамма блестящих цветных и металлизированных материалов, приготовленных на основе полиэстера и алюминия, которые характеризуются особым блестящим эффектом, созданным из блестящих и искрящихся частиц. Используется в основном в сочетании с нейтральной основой или с другими цветами гаммы Colorepoxy.

gestione forestale
responsabile

Questo catalogo è stampato su carta certificata FSC.

Cos'è FSC

FSC è un'organizzazione non governativa internazionale, senza scopo di lucro, che include tra i suoi membri gruppi ambientalisti e sociali, comunità indigene, associazioni di consumatori, proprietari forestali, tecnici, enti di certificazione, industrie di lavorazione e commercializzazione del legno.

Obiettivo di FSC è promuovere in tutto il mondo una gestione delle foreste e delle piantagioni che tuteli l'ambiente naturale, sia utile per la gente (lavoratori e popolazioni locali) e valida dal punto di vista economico.

This catalog is printed on FSC certified paper.

About FSC

FSC is an international, non-governmental, not-for-profit organization consisting of a diverse group of representatives from environmental and social groups, the timber trade and the forestry profession, indigenous people's organizations, responsible corporations, community forestry groups and forest product certification organizations from around the world.

FSC was established to promote the responsible management of the world's forests that benefit people and the environment as well as providing ongoing business value.
